

# ✓ Checklist: 5 Ways to Prepare for AI in Freight & Logistics

## 1. Audit Your Current Tools and Workflows

- List the software, apps, and systems you use for dispatch, routing, billing, and load boards
- Identify which ones already have automation or AI features built in
- Explore what updates or training your team may need

## 2. Train Your Team on Digital Basics

- Provide basic training on data entry, digital documents, and AI terms
- Teach how to spot and correct AI mistakes — human oversight still matters
- Encourage team members to ask questions and suggest improvements

## 3. Start Small With AI Tools

- Test AI features like smart routing or automated rate calculations
- Use AI chat tools for customer service templates or email drafts
- Track time saved or errors reduced to measure impact

## 4. Assign a Tech Champion

- Choose someone to stay up to date on new tools and share best practices
- Let them test AI add-ons and report back on usefulness
- Have them help train others on new features

## 5. Focus on People, Not Just Technology

- Reinvest time saved into better customer service or team development
- Build trust by explaining why and how AI is used
- Keep humans in the loop for final decisions and relationship management

## ☀ The Road Ahead

At By All Means Freight Solutions, we believe AI isn't here to take over jobs — it's here to **help us do our work better**. The freight industry is full of smart, hard-working people. With the right tools and a little preparation, this technology can be a boost, not a burden.

We don't need to fear the future. We just need to be ready to shape it — together.

 **Want help implementing AI-friendly strategies in your logistics or brokerage business?**
